PRODUCT

How it works

The customer journey as the homepage describes it. Five steps, one cycle.

1

Create an account

Register with email, Google or a Solana wallet.

2

Deposit

Fund with USDC or most major tokens; it is credited as USDC on Solana.

3

Open a stake

Choose an amount from $10 and start the 30-day cycle.

4

StakerGPT trades

The system evaluates markets, filters setups and routes approved trades.

5

Rules worth quoting

- Each stake sets its own tier.
- A later manual stake by the same customer can earn again.
- Self-referrals and abusive patterns are not eligible.
